We are currently recruiting a

POSTDOCTORAL SCHOLAR in Neurobiology

Stanford University School of Medicine Department of Otolaryngology – Head & Neck Surgery

A Postdoctoral position is available in the laboratory of Dr. Nicolas Grillet at the Department of Otolaryngology at Stanford University.

The aim of our laboratory is to understand the physiology and the pathologies of the auditory nervous system focusing on the inner ear. Using the mouse genetics we want to identify and explore the molecular function of genes leading to deafness. We are using multiple approaches including molecular and cellular biology, biochemistry, electronic microscopy, biophysics, bioinformatics and electrophysiology. More info about the lab can be found at http://grilletlab.stanford.edu.

The Otolaryngology Department provides a highly dynamic and collaborative environment fostering scientific breakthroughs.

The candidate must have obtained his/her Ph.D. degree recently (less than one year or defending soon), have acquired a solid publication record, and master some of the techniques of interest in the lab. We are expecting high motivation and ability to work independently as well as part of the team. Strong verbal and written communication skills in English are required.

To apply, please send a CV, a cover letter describing your previous work and career goals, and the contact information for three references to Dr. Nicolas Grillet at ngrillet@stanford.edu.
